

PBE Rutherford

INNOVATING SAFETY. POWERING PRODUCTIVITY.

*A World Leader in Power Systems
for Mining & Infrastructure*

pberutherford.com

PBE Rutherford

PBE Rutherford is a leading permanent power solutions and cable services manufacturer servicing the mining and infrastructure markets in Australia. The business operates across five main areas: Cables & Couplers, Manufacturing & Overhauls, Equipment Hire, Site Electrification Projects, and Site Services.

PBE Axell

PBE Axell is a global manufacturer and systems integrator of electronic safety products and data & communication infrastructure serving the Mining, Tunnelling, Construction, and associated industries .

ADE MODULAR • POWER • ACOUSTICS A PBE COMPANY

ADE Power is a leading manufacturer of customised generator and switchgear enclosures, targeting the IT Infrastructure (including Data Centres), Critical Power Infrastructure, and related end markets.

PBE Rutherford
FIVE DIVISIONS
ONE VISION

PBE Rutherford operates through five divisions, each with unequalled specialist experience in its field. This enables us to select products, services and expertise from across our divisions to build the solution that best matches your short-and long-term goals.

In this way, we can deliver a depth of technical knowledge and engineering excellence and a breadth of products, services and solutions.

Five specialist divisions. One singular vision: to provide the perfect, unified solution every time.

- Cable Services & Couplers
- Manufacturing & Overhauls
- Equipment Hire
- Site Electrification Projects
- Site Services

CABLE SERVICES & COUPLERS

CABLE SERVICES & COUPLERS DESIGNED FOR THE LONG HAUL

Cable Services delivers a full range of services including on-site testing, cable repairs, cable sales, training and audits, and our own-design CouplerCo range of industry-leading cable coupler products.

Our technical expertise is reflected in the fact that we also design and build our own patented cable testing and repair equipment.

With global distribution, and facilities in five strategic locations in Australia, Cable Services is your go-to supplier of power reticulation and trailing cables.

MANUFACTURING & OVERHAULS

 **PBE Rutherford**

MANUFACTURING & OVERHAULS BUILT TO LAST THE PROJECT'S LIFETIME

Housed in a unique large-scale manufacturing facility at an international transport hub, our Manufacturing & Overhauls division designs and manufactures a wide range of large-scale high voltage equipment: Substations, Load Centres, Switchboards, Section Circuit Breakers, Flameproof Enclosures, and more.

The facility is a centre of excellence staffed with experienced and highly qualified technicians. Meeting all Australian and international standards, we provide a complete refurbishment, re-certification and repair service as an approved workshop facility.

PBE Rutherford

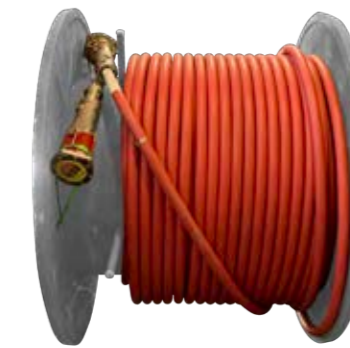

EQUIPMENT HIRE

**CRITICAL
COMPONENTS, FASTER**

We can supply critical components while your equipment is being serviced or repaired. Or you can power up quicker, with no capital spend, with a complete, turn-key power system including installation, commissioning, and management for the life of the project.

Our Equipment Hire division maintains a wide range of project components, ready to ship. We also take advantage of our location at an international shipping hub to provide expedited delivery.

Our range of equipment includes Substations, Switchrooms, Load Centres, Switchboards, Section Circuit Breakers, Cables, Generators, Ventilation Fans, plus much more.

SITE ELECTRIFICATION PROJECTS

SITE ELECTRIFICATION PROJECTS FROM DESIGN TO SUPPLY TO OPERATION

Our Site Projects division supplies everything required for a complete turnkey high voltage power system solution, including design, manufacture, construction, commissioning, maintenance and operation. This includes the Electricity Network Connection through our licensing as an Accredited Service Provider (ASP1).

We can also design and deliver sub-systems to fit your exact project requirements, including lighting, control, monitoring, data, comms, safety and telemetry systems.

In addition to ongoing maintenance and servicing, we can also provide operational support for the life of the project.

PBE Rutherford

SITE SERVICES MORE UP-TIME NO LET-DOWNS

Site Services delivers a range of tailored and responsive life-cycle service, maintenance and replacement packages.

On-site services cover all of your regular and timecritical requirements, including HV maintenance, testing, transformer oil analysis and filtration, borehole cable installation, cable jointing, CCTV & comms, and test equipment calibration.
