Australia's No. 1 Hire Company  
[www.conplant.com.au](http://www.conplant.com.au) | 1300 166 166

# Need to hire a roller, excavator or site dumper for your next job? We've got the equipment for you.

Conplant has Australia's most comprehensive roller hire range - more than **1200 pieces of construction and compaction equipment** across all classes and applications. And with branches all over Australia, you're never too far from your nearest Conplant branch and our friendly, reliable service.

Type	Range (kg)
Trench Roller	1,500
Tandem Smooth Drum Roller	1,500 – 14,000
Smooth Drum Single Drum Roller	5,000 – 25,000
Padfoot Single Drum Roller	3,500 – 28,000
Multi Tyred Roller	2,000 – 24,000
Combination Roller	2,500 – 10,000
Static Three Point Roller	12,000 – 15,000
Site Dumper	6,000 – 9,000
Excavator	2,700 – 5,500

## Equipment delivered by an expert - not just a driver. Experienced drivers in GPS-equipped heavy vehicles.

When you order equipment from Conplant, we don't just drop it off and leave you to it. Your driver will also be a trained equipment expert, who'll provide you with operational tips and safety instructions to make sure you're ready to start work.

It's all part of our commitment to service and safety.

“

*Our clients are dealing with all sorts of work sites, contracts and projects - our job is to make sure they've got the right equipment and that it's well-serviced and reliable so they can get on with the job.*

# Innovations to make your work safer.

**ROPS2**  
Roll Over Preventative System

**CAS**  
Intelligent Integrated  
Collision Avoidance System

## ROPS2: Roll Over Preventative System

Heavy mobile plant rollovers are a risk of working on site, and can have disastrous consequences. To reduce this risk, we developed our own patented Roll Over Preventative System (ROPS2).

ROPS2 warns the operator when a potentially dangerous angle is detected, and shuts down the roller's vibration if the angle continues to increase. The technology recently won a National Safety Award, and has been adopted by many industry-leading customers.

**ROPS2 comes standard with a huge range of Conplant rollers and can be fitted upon request.**

## Remote + Manned: The best of both worlds

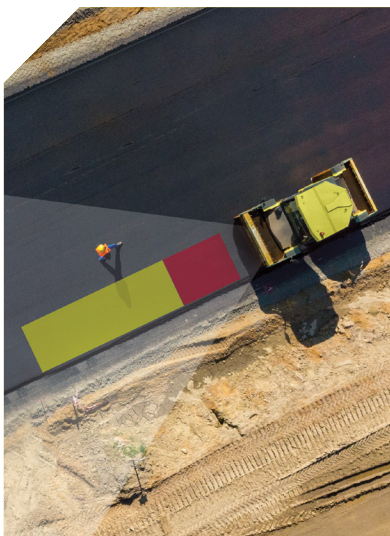

Remote-controlled operation of the plant is a lifesaver when compacting in hazardous conditions. However, not all situations call for unmanned operation.

We've designed a hybrid system that's flexible enough to deal with the variables of modern worksites. Simply switch from manned to unmanned with the turn of a key.

The system has an automatic parking brake, warning lights and directional alarms. Up to 10 machines can be controlled in the same area without interference.

**The technology can be fitted to a wide range of Conplant rollers - even up to the largest 28-tonne units.**

## IICAS: Intelligent Integrated Collision Avoidance System

We're working to eliminate collisions in working environments with our Intelligent Integrated Collision Avoidance System (IICAS).

IICAS actively detects obstacles in the machine's path using True 3D Smart Cameras, and will automatically slow down or stop the machine if the obstacle becomes too close for safe operation.

An audible alarm and traffic light system inside and outside the cab is used to warn the operator and people on site of potential hazards.

**IICAS is beginning its rollout across the Conplant range, and we're looking forward to seeing it adopted throughout the compaction industry.**

# Advanced Soil Compaction Solutions? That's Landpac Intelligent Compaction.

For 35 years, Landpac has built a reputation across the Asia-Pacific as the best source for deep and in-situ compaction solutions for:

-  Bulk earthworks
-  Land reclamation
-  Ground improvements of uncontrolled fills
-  Mine site rehabilitation
-  Remediation work
-  Compaction of contaminated material

Landpac's High Energy Impact Compaction (HEIC) enables compaction of in-situ fills and weak natural soils to depths of 5m, as opposed to an average maximum of 500mm for vibratory compaction. The result? Significantly improved engineering soil properties, faster and at lower cost.

HEIC often allows compaction without the need to unearth or disturb what's underneath, reducing the risk of contamination or expensive alternatives.

It's the perfect solution if working with adverse soil conditions, poorly-compacted or loose fill, contaminated material or uncontrolled fill where earthworks logs have been lost.

Call **1300 166 166** to find out more about Landpac's HEIC technologies.

# Smarter, safer, and more efficient compaction with Völkel.

Völkel Intelligent Compaction – the advanced technology that uses cutting-edge vibration sensors to accurately detect soil and asphalt compaction in real-time enabling operators to achieve optimum compaction levels, improving efficiency, quality control, and reducing environmental impact.

The system's modular design means that the display unit, GPS, and modem are all removable and can be used on multiple machines, providing a flexible and cost-effective solution for construction companies. Additionally, the cloud-based CompactDoc application provides access to project files live from anywhere, enabling operators to print reports and provide compaction evaluation documentation.

-  Improves efficiencies across the worksite
-  Easy installation and operation
-  Works across the full range of compaction equipment
-  Maximises accuracy and reduces costs
-  Can be retrofit to your machine regardless of type, make or brand
-  Easy verification and compaction control

# Keep on moving with TrackPads Australia.

Conplant brought TrackPads Australia on board to guarantee high-quality rubber products to our customers.

We now stock a wide range of compatible track pads for market-leading excavator brands including Bobcat, Caterpillar, Develon, Hitachi, Hyundai, Komatsu, Wacker Neuson, Yanmar and more - all with our fast dispatch service.

-  Expert-curated selection of the best premium rubber tracks and track pads on the market
-  Tougher than the rest - super-high tensile strength, tear-resistant rubber
-  Quick and easy to install to maximise worksite uptime

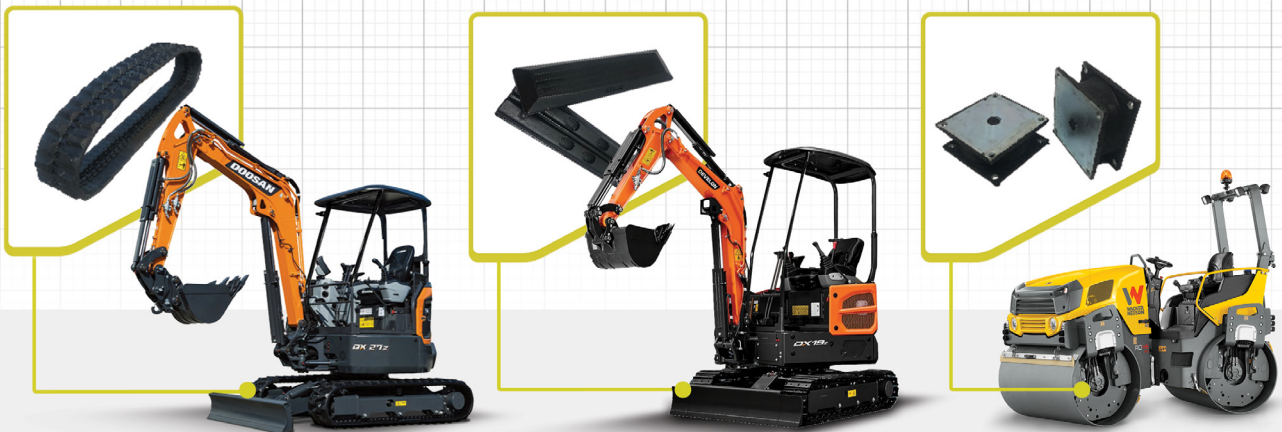

## Not just tracks and pads.

We also stock a range of specialty drum mounts and rubber buffers, wear parts for pavers, excavators, and earthmoving equipment plus undercarriage components for a range of excavators and pavers.

We can also help you find rubber fenders for tugboats, wharfs, and delivery docks.

Shop the full range at [trackpads.com.au](https://trackpads.com.au)

## Rubber Tracks

Every major make and model covered. Our tracks are built to last, and keep your worksite moving.

## Rubber Pads

High quality bolt-on, clip-on or chain-on pads, that are easy to mount and change, saving you time on the worksite.

## Rubber Buffers

Heavy-duty and tear-resistant, our rubber buffers, drum mounts and more are made with the highest quality to ensure peak performance.

**Need engines?  
Think DEUTZ.**

**DEUTZ authorised equipment partner for engines, parts and service.**

DEUTZ Engines are known for their maintenance-friendly design, great fuel economy, maximum productivity and low emissions.

Whatever you need for your DEUTZ engine, we've got it - ready to be dispatched to your site.

-  Starter motors
-  Pressure sensors and switches
-  Temperature sensors
-  Engine components
-  Fuel injection pumps
-  Lift pumps
-  Seals and gaskets
-  Belt tensioners and oil coolers

**DEUTZ power + Conplant know-how.**

Our service teams train alongside Deutz in Australia and Germany, including comprehensive training on DEUTZ's environmentally-friendly Tier 4 technology.

Visit [conplant.com.au/deutz-specials](http://conplant.com.au/deutz-specials) to see what's on offer this month.

**Service and parts to keep you running.**

**Award-winning service, standard with every sale.**

Our experienced, knowledgeable Conplant technicians and parts experts all around Australia are here to help - whether it's advice over the phone, rapid response field service, mechanical repairs or a major overhaul.

We've got a multimillion-dollar parts inventory throughout Australia – everything from oils to new engines and accessories like UHF radios - so we'll have it in stock, or we'll get it in fast.

“

*At Conplant, the attitude is always 'customer-first'. Our sales staff love helping a customer find that perfect piece of equipment and then following up to make sure it's working well for them.*
