

Bringing
projects to life.

Approvals | Project Management | Compliance

We are an expert environmental advisory and consultancy team.

Experienced with some of the most environmentally
challenging projects in Australia and internationally.

About Us

Bringing projects to life.

We are a multi-disciplinary consultancy with expert advisors ready to navigate and solve complex environmental and social challenges through experience and technical knowledge.

Established in regional NSW in 2018, we have grown into a thriving team, delivering and supporting state significant and critical state significant projects throughout Australia.

Our services extend across the whole project lifecycle, from feasibility and due diligence planning to environmental assessment and approvals, post-approvals environmental management, auditing and compliance, through to decommissioning and rehabilitation.

With offices in Armidale, Brisbane and Newcastle, we partner with clients in the renewable energy, mining and infrastructure sectors.

Why Onward

Your expert, trusted partner at every step.

At Onward, we are tenacious in our pursuit of excellence for our clients and projects.

Our experienced team of advisors have extensive and unique experience on some of the most challenging projects throughout Australia and around the world. We provide tailored solutions to help our clients navigate the complexities of environmental approvals and management, from concept through to construction, operations and decommissioning.

Our commitment extends across the entire project lifecycle, guiding you seamlessly through each stage. We pride ourselves on the delivery of sensible environmental management outcomes. Having us as part of your team will provide the expertise and relationships you need to bring your project to life.

At Onward, we provide expert and professional guidance for our clients every step of the way.

Environmental assessment and approvals

Our approvals and project management experts deliver major resources, renewable energy and infrastructure projects in environmentally sensitive areas and complex regulatory landscapes.

Engagement and social planning

Our engagement and social planning specialists engage meaningfully with key stakeholders, manage social impacts and integrate social strategies to enhance the reputation of your project.

Environmental management

Our qualified environmental practitioners identify and manage environmental management requirements at the corporate level and project sites through enhancement of environmental management systems.

Spatial services

Our spatial experts use the latest technology and mapping packages to deliver data visualisations and assist clients in the interpretation of complex information to manage risks and support decision making.

Auditing and compliance

Our certified auditors review regulatory and corporate obligations to provide internal evaluation and external audit reporting to regulators as well as assist clients in achieving compliance and delivering innovative corporate sustainability strategies.

Experience

Bendemeer Renewable Energy Hub

Metis Energy

Coordination of environmental impact assessment for solar, wind and battery project components

Beryl Solar Farm Modification 3

Premise | Banpu Energy

Community engagement and social impact assessment

Boggabri Coal Mine

Idemitsu

Internal environmental audit and self-assessment audit against the Towards Sustainable Mining framework

Cadia Valley Operations

Newmont

Modification of approval, compliance support, and development of Environmental Management System

Carbon Dioxide Processing Plant

Supagas
